OBJECTIVES

Full Stack Developer with 2.5 years of expertise in frontend (JavaScript, TypeScript, Angular, React) and backend (Node.js, Express.js, MongoDB, MySQL) technologies. Committed to creating efficient, scalable, and user-friendly web applications. Seeking opportunities to contribute technical skills and innovation to a dynamic development team.

EXPERIENCE

Software Engineer

January 2023 – Present

Skills outsource think pvt ltd

Bengalore, KA

- In-depth knowledge of JavaScript, CSS, HTML, and front-end languages.
- Knowledge of REACT frameworks including NextJS, Webpack, Axios, Redux, prettier, eslint.
- Integrating with various APIs (Application Programming Interfaces) to fetch and display data from external sources.
- Worked in backend development with a focus on Node.js, specializing in creating robust APIs and performing data manipulation from databases.
- Successfully designed and implemented scalable solutions, ensuring efficient data retrieval and manipulation for optimal application performance.

Full Stack Developer

November 2021 – December 2022

Infognana solutions

Coimbatore, TN

- Collaborate with a team of four other developers to design, develop, and maintain web applications using ReactJS, Node JS and Express JS, mongoDB, postgresQL.
- Write clean, efficient, and well-documented code while adhering to coding standards.
- Select appropriate technologies and tools based on project needs to ensure optimal performance and scalability.

PROJECTS

Ownership fyi | React, React Native, Typescript, Nestjs, PostgreSQL,

October 2023 – Present

- Developed a full-stack web application using Nestjs with typescript serving a REST API with React as the frontend.
- Developed a mobile app using React Native for user and business partner ownership.
- Developed NFT authenticator provides the safest way for every user to prove their NFT Ownership without the risk of being hacked.

Eurecab | React Native, Javascript, Redux, Firebase, Git, Postman

May 2023 – September 2023

- Developed a French-based cab service platform that comprises two apps: one for customers(Eurecab-Votre VTC Responsable) and another for drivers(Eurecab Chauffeur Privé VTC).
- Successfully achieved over 50,000 downloads, reflecting the app's popularity and widespread user adoption.
- Maintained a stellar 4-star rating, underscoring the positive reception and satisfaction of users.

Haiku | Angular, Typescript, CoreUI, RxJS and NgRx, Scss, Git, Jira

January 2023 – April 2023

- Utilized Angular technology to develop and enhance the frontend, providing users with an intuitive interface to seamlessly create and manage advertising campaigns.
- A dynamic social media marketing platform specializing in targeted advertisement campaigns across major channels, including Facebook, Instagram, TikTok, Waze, and more.

Eassycart | React, Javascript, Nodejs, ExpressJS, postgresQL, mongoDB ,Git

December 2021 – November 2022

- Developed scalable and user-friendly solutions that enhanced the overall online shopping experience.
- Developed a web app using React and employed Redux for efficient state management.
- Worked on the backend of this project, creating APIs and establishing database connections for data manipulations.

TECHNICAL SKILLS

Languages: HTML, CSS/SCSS, JavaScript, Typescript, SQL

Frameworks: React, Angular, Nextjs, Node.js, Expressjs, Nestjs, Material-UI, Bootstrap, MongoDB

Developer Tools: Git, Postman, Jira, Gitlab, Firebase, Visual Studio Code
